### ADULT OCCUPANT

The protection offered to the driver's head and chest was poor and for this reason the star capping was applied. Driver's chest protection was weak due to contact with the steering wheel. The passengers knees could impact with dangerous structures in the dashboard lie the transfascia tube. The bodyshell was rated as unstable. The bodyshell was not capable of withstanding any further loading.

### CHILD OCCUPANT

The child seat for the 3 year old child was unable to prevent excessive forward movement during the impact. The 18 months dummy presneted high loading in its chest. The 3 years old child shower high loadings in head and chest. The installation instructions on both child seats were insufficient and not permanently attached to the seat. The vehicle was not equipped with a passenger airbag.
