SUZUKI MARUTI SWIFT - NO AIRBAGS

ADULT OCCUPANT PROTECTION

- The protection offered to the driver's head and chest was poor and for this reason the star capping was applied.
- Driver's chest protection was weak due to contact with the steering wheel.
- The passengers knees could impact with dangerous structures in the dashboard like the transfascia tube.
- The bodyshell was rated as unstable.
- The bodyshell was not capable of withstanding any further loading.

CHILD OCCUPANT

- The child seat for the 3 year old child was unable to prevent excessive forward movement during the impact.
- The 18 months dummy presented high loading in its chest.
- The 3 years old child showered high loadings in head and chest.
- The installation instructions on both child seats were insufficient and not permanently attached to the seat.
- The vehicle was not equipped with a passenger airbag.
